

Economy, Ranks, Flight & Voting

Account economy

```
/balance  
/pay <player> <amount>  
/baltop
```

The account balance is the server's unified currency. Player shops, direct payments, rewards, and compatible plugins debit or credit the same balance.

Progression

```
/autorank  
/ar
```

Autorank tracks eligible playtime paths. Member reaches Trusted after one hour; the Veteran path is a long-term milestone.

Timed flight

```
/tempfly  
/tfly  
/tf
```

Use the plugin's help output for subcommands available to your group. Time does not drain while grounded or idle under current settings, but it does drain during active flight.

[Read the full Timed Flight guide →](#) for balances, countdown behavior, restrictions, warnings, and troubleshooting.

Voting

/vote

/votestreak

Voting options and rewards can change. Use the live command output as the current source of truth.

Do not test zero flight time at altitude. Land first, experiment second. Gravity has already completed its testing.

Revision #5
