

PlagueMC Knowledge Base

New survivor?

Start at the gates. Learn how to connect, establish a shelter, protect your supplies, and locate home without leaving a breadcrumb trail of dropped equipment.

[Open Start Here →](#)

Know the code

Respect players, builds, fair play, and the shared world. The short version takes less than two minutes.

[Read Rules & Community →](#)

Enter the world

Java Edition

`play.plaguemc.xyz`

Default port: `25565`

Bedrock Edition

play.plaguemc.xyz

Port: 19132

Hard-mode survival. Cross-play is enabled, the world is persistent, and your first priority should be food, shelter, light, and a home point—in roughly that order.

Need help?

For quick questions, ask in game. For connection problems, private reports, screenshots, or incidents requiring staff attention, use Discord. Bring evidence; the server produces enough folklore without help.

Include the useful bits

- Your exact Minecraft username
- Java or Bedrock and your version
- What happened and what you expected
- Time, world, and coordinates when relevant

Protect the evidence

- Take screenshots before changing the scene
- Do not retaliate or publicly escalate
- Never share passwords or recovery codes
- Give staff enough time to investigate

Ready? Read [Your First 15 Minutes](#), join at `play.plaguemc.xyz`, and try not to become part of the scenery.

Revision #8
